PAS91 Assessment: Environment

From £99 plus VAT

The PAS91 Environmental Assessment streamlines supplier evaluations, by helping businesses meet pre-qualification requirements and demonstrating their commitment to sustainability.

The purpose of this assessment is to ensure you have the minimum environmental controls in accordance with PAS91 compliance. If you have a valid ISO14001, BS8555 or EMAS certificate from a UKAS accredited certification body you can supply this instead.

The environmental section of PAS 91 focuses on how a supplier manages environmental risks and responsibilities. This typically includes:

- ✓ **Environmental Policy:** A review of the environmental policy and responsibilities.
- ✓ **Operational Arrangements:** Practical controls in place to implement environmental controls.
- ✓ **Awareness:** awareness and training on relevant environmental issues.
- ✓ **Monitoring & Review:** Your approach to the environmental monitoring and review of policies.

Why Choose PQS Environment Assessment?

- ✓ Independent recognition and approval.
- ✓ A framework for ensuring compliance.
- ✓ Independent recognition and approval.
- ✓ Enhance corporate reputation with stakeholders.
- ✓ Maximising fulfilment of client and tender requirements.
